

New Product Announcement

January 1, 2024

Product Category: Ignition Parts

Product Sub-Category: Ignition Caps and Rotors

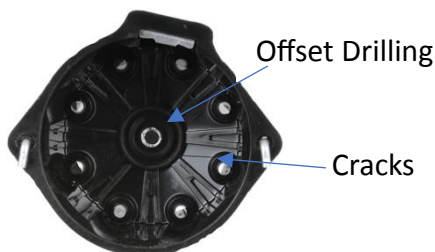

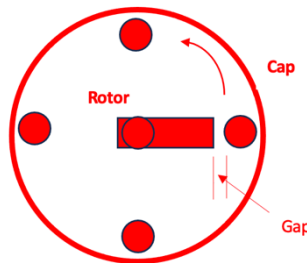

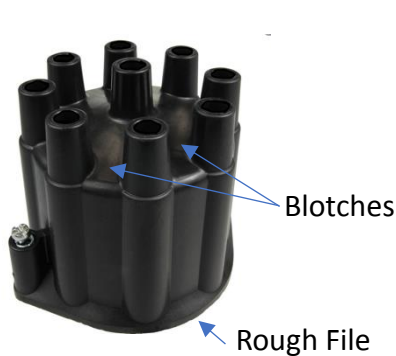

Applications: Automotive, Marine, Agriculture, Industrial

Source: United States Manufacture Specializing in Original Specification Caps & Rotors.

Product Differentiation:

- Our manufacture specializes in hard to source Ignition Caps & Rotors; all made in the USA. By adhering to original specifications for materials and quality, we can offer customers high quality, Made in the USA, product that is desirable to the average consumer in the Legacy Parts Category.
- Consumers have shown that they will pay more for Made in the USA product for their Legacy Application. Our packaging is labeled Made in the USA, as opposed to other brands where the manufacture of origin is questionable.
- Many optional colors are available.
- Higher Quality means less returns and better performance.*

* Adherence to OEM specifications and original drawings ensures that tolerances like the critical rotor blade to cap terminal gap are as required. This ensures maximum performance.
